## **DETAILED ACTION**

### ***Drawings***

The drawing have not been considered being that the drawing does not comply with the requirements set forth by 37 CFR 1.121. The proposed drawing is not accompanied with a figure designation, nor has the specification been amended to reflect the proposed drawing. Being such is the issue the proposed drawing cannot be considered.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 4, and 5 are rejected under 35 U.S.C. 102(b) as being anticipated by Beebe et al. (USPN 6186903).

Regarding claim 1, Beebe et al. discloses a iron-type club head comprising a body having affront face arranged for impact with a golf ball, a back face, a heel portion, and a toe portion; a hosel connected to the heel portion of the body wherein the hosel has a longitudinal axis; a perimeter weighting element protruding rearwardly from the front face defining a primary cavity in the back face wherein the primary cavity has a bottom surface and the primary cavity includes a top rail extending between the heel and toe portions along an upper portion of the body and wherein the perimeter weighting element includes a sole extending between the heel and toe portions along a

lower portion of the body; an interior wall extending from a first end connected to the perimeter weighting element adjacent the body heel portion through the primary cavity between the top rail and the sole to the second end connected to the perimeter weighting element adjacent the body tow portion defining an elongated secondary cavity within the primary cavity and wherein the interior wall being integrally formed on the bottom surface of the primary cavity and extending from the bottom surface of the primary cavity in a direction that is substantially perpendicular to the longitudinal axis of the hosel thereby forming an included acute angle between the interior wall and the bottom surface of the cavity and the interior wall having a height dimension that varies between the first and second ends thereof with the height dimension of the interior wall being greater at the second end than at the first end (See Figures 1-9 and Columns 2 and 3).

Regarding claim 4, See illustration above regarding claim 1.

Regarding claim 5, Beebe et al. discloses the weight adjustment member being selected from a plurality of weight adjustment members of different weights. (See Column 3, lines 16 through 37).

### ***Response to Arguments***

Applicant's arguments with respect to claims 1, 4, and 5 have been considered but are moot in view of the new ground(s) of rejection.
